

Consolidated Carpet Sees Success at St. Mary's Hospital for Children

Consolidated Carpet is proud to announce the completion of their installation at the St. Mary's Hospital for Children in Bayside, New York.

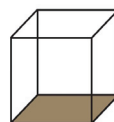

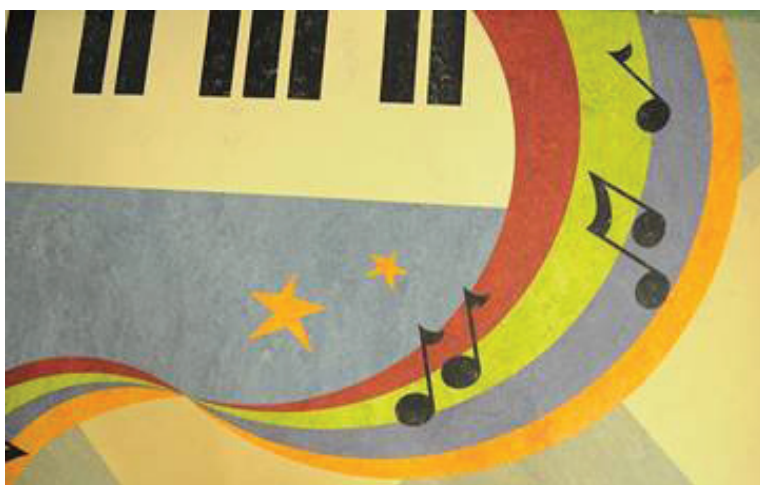

Consolidated furnished and installed nearly 65,000 square feet of Forbo Marmoleum Dual Tile throughout the five-floor facility. The team utilized evidence-based design throughout all stages of the project to ensure that a properly designed and safe healthcare space was created for the children. Requirements for the space mandated the usage of slip resistant, stain resistant, low maintenance, and sustainable materials— all of which were achieved through the chosen product.

The project featured a wide variety of custom-designed and cut installations, such as rainbows and piano keys that can be found in one patient treatment room. The intricate designs were created through Forbo's water-jet cutting process that creates precise, ready-to-install pieces.

Many of the rooms were specially installed with circular cuts and radial designs, a detailed and unique way of installing resilient products. Consolidated employed their expert installers to meet the strict deadlines and install the intricate patterns. In order to complete many of the cuts, Consolidated utilized the specialty Forbo circle-maker and extension pole tool to effectively overcome any challenges in the design.

The new Patient Pavilion will be a calming center for the treatment of children with a wide variety of illnesses. With features specially designed to accommodate the needs of healing children such as alcoves for wheelchairs and state-of-the-art technology for maintaining real-time charts, the facility provides a relaxed environment for children to thrive in, while they receive care.

The success of the St. Mary's Hospital project affirms the commitment and expertise that Consolidated Carpet has for high quality flooring and installations in the Healthcare Industry.
